Two years ago, we moved to a new city. It's smaller than our hometown. In the beginning, I didn't use to the life here. There are no cinemas or big shopping malls. There's only a small park and a small supermarket near my house.

But gradually, I got to like the life here. First, there're fewer cars in the street. I don't need to worry about the traffic. Since I live not far away from my company, I often go to work by bike now. I'm not busy any more. I often have supper at home and after that, I can walk with my wife in the park. There're many flowers in it.

The changes to my hometown

There have been great changes in my hometown over the years.

My hometown used to be a quiet town. There were green hills and clean water in the past. The air was fresh. People went around by bike or on foot. But now it has become a modern town. There are many tall buildings and you can see wide roads everywhere. Many buses drive past our community every day. Many people have their own cars, so it's easy to travel around.

However, the changes of my hometown have also brought us a lot of trouble. For example, the water and air are not as clean as before. And it's difficult for us to walk on the road on holidays because there're too many people.

I think we should take action to make our environment much better.

Dear classmates,

Today, I would like to talk something about the Internet.

Nowadays, many of us like surfing the Internet. We can use the Internet to search for information and improve our knowledge. We can keep in touch with our friends, too. Furthermore, we can learn more about different cultures through the Internet.

However, some of us spend too much time playing computer games and communicating with net friends. We forget our friends in real life. It's not a good habit.

I think we should learn more about the world through the Internet. We can read books online too. But we'd better not play too many games.

I like reading. I love many different kinds of books, because they not only open my mind but also give me courage.

Up to now I have read a lot of books, such as magazines, novels and storybooks. But one of the books that I like best is *The Story of My Life*. It was written by American writer Helen Keller in 1902. She was a blind, deaf and dumb person. In the book, she wrote that she had not been able to see, hear or speak since she was one year and seven months old. This unusual thing made her very sad. Luckily, she met her good teacher, Miss Sullivan. Helen was getting happier every day. Then, Miss Sullivan helped her learn how to write English words. Helen was a very hard-working girl. She tried as much as possible to remember words. After that, she wrote many famous works.

The Story of My Life shows an important truth: Nothing is difficult if you put your heart into it! This is why I like it best.

And every weekday afternoon, we can listen to books by the school broadcast station. It brings us lots of fun. Our school also has a rule: each student must read at least five good books a term.

I found a short line with just one person in front of me. It was an old woman, and she was paying for her things with only change. After a long day at work, I was unhappy with this old woman.

But then I watched the young worker. He helped her count her change, so carefully taking it from her shaking hands. When she asked if she had enough to buy a bag, he told her she did. Then he went two lines over to get one for her. Never once did this worker get angry. He was patient and kind.

As I was watching him, I saw Eloise was too. I realized that my daughter was learning an important lesson from a stranger.

The man thanked me for my patience when it was my turn. I thanked him too.

Dear all,

I found many people behave badly when visiting the City Museum. We need to be a polite person.

It's very important to be a person with good manners. First, we should keep quiet in the museum and other public places. We should keep our voice down. It is bad manners to laugh or talk loudly. Second, we should keep the environment clean and don't drop litter everywhere. Third, we shouldn't touch the pictures or other important things in the museum. Sometimes, it's impolite to take photos of the things on display. Fourth, we should queue for our turn. It's rude to push in before others.

It's our duty to behave politely and properly. Let's say goodbye to bad manners.

Yours sincerely,

Andy

As a member of volunteers, I got up early last Saturday because I was too excited to sleep. In the morning, we brought some flowers and fresh fruits.

As we arrived at the Happiness Nursing Home, we sent them our best wishes too. How happy they were! Then we cleaned the windows and swept the floor for them. After that, some of us sang and danced for them. Some of us read newspapers to them or chatted with them.

From this meaningful activity, I found that we are supposed to care for the old and respect them.

Alison Lapper, a very unusual painter, paints pictures for a living. She doesn't use her hands when she paints. She uses her mouth! Alison was born without any arms. Her physical problem made her spend the first seventeen years of her life in a hospital. But this didn't stop her from making her dreams in life come true. She realized that even though she was disabled, she could express herself as freely as other people. This was what got her to start drawing paintings.

Although Alison lives quite a different life from others, she believes that she can succeed as others. Her paintings are excellent and they do not look like they were drawn by someone who used her mouth. Her active way of living has encouraged many disabled people around the world and will continue to do so in the future.

People around the world waste food every day. It is reported that every year Chinese people throw away a lot of food which can feed 200 million people for a year. And the amount of food wasted by Chinese people is increasing fast. We should order fewer dishes when we eat in a restaurant. And if we can't eat them up, we can take them home and eat them later. When we buy food in the supermarket, we should buy only what we need. We shouldn't bring much food we don't need at home even if large posters ask us to do so.

We share the Earth with billions of others. And we all need air. But products need to be moved from one place to another. And we all know that most cars, boats and planes cause air pollution. Clever people have found many ways to reduce pollution.

In many big cities, motorcycles are very popular. Now Vietnam has around 33 million motorcycles and China has almost 120 million. They run fast and cost little. And there're many cars. As a result, air pollution is a growing problem. In many cities, people find it is difficult to breathe. To do with these problems, a US company designed a new kind of motor. As a result, there is less pollution. It's also quiet and fast. This makes it a fantastic choice for getting around a city.

How to protect the environment

As we all know, the environment in many places is becoming worse and worse.

In some places, there's no fish in rivers because the water was seriously polluted. Some people even have no clean water to drink.

We must do something to improve the situation. As a student, we can go to school on foot or by bike. We can reduce the air pollution in this way. And in our daily life, we should use both sides of the paper. We can use cloth bags instead of plastic bags when we go shopping. It's necessary for us to ask our parents to do so.

By doing these small things, there will be less pollution, and our life will be better.
